(5) Spinner	(15) Cutting blades
(6) Container	(16) Glass container
(7) Blade	(17) Container base
(8) Motor housing	(18) Cuff
(9) Plug	(19) Outer base
(10) Plug	

HOW TO USE SCRAPER

Specialty designed scraper can be inserted through the cover opening while blending without interfering with the cutting blades or the grinding blades.

Scraper is useful when:

- To mix liquid mass ingredients hard to blend (for dips, sauces, curry dishes)
- To add items back to side of container (for example garlic, chili pepper)

Slide the scraper through the cover opening and scrape to remove food sticking to container sides.

CAUTION

Use your scraper during blending only through cover opening. Do not use with cover off.

CIRCUIT BREAKER PROTECTION

When circuit breaker automatically stops motor due to overloading, after 10 second interval, switch off (3). Unplug. Complete the following instructions, then resume operation.

<p>Juicer</p> <p>Cut ingredients small enough to fit into feeder opening.</p> <p>Push ingredients into feeder gently, too much force activates circuit breaker.</p>	<p>Blender</p> <p>Reduce ingredients to less than half.</p>

HOW TO USE

Juicer

- Assemble container, spinner, and juice cover.
- Secure container cover with clamps. Place gems or ball under spout.
- Wash and cut ingredients to fit in feeder opening.
- Plug in. Press control (2).
- Plug ingredients into feeder to make juice.
- After using, switch off (3). Unplug.

CAUTION

- Do not use soft fruits such as bananas, peaches, apricots, or tomatoes, which produce a puree and clog screen.

- See note to blender container base completely. Place ingredients in container. Close.
- Place container on motor housing.
- Plug in. Select one of two speed buttons as required. Use "PULSE" button for precision blending.

CAUTION

- Maximum capacity: 1,000ml
- Do not crush ice cubes alone
- Do not blend long. Blend with liquid
- Do not operate blender longer than 4 minutes at one time
- Stop if 2 minutes. Let it rest.

Dry mill

- Turn mill upside down and remove outer base.
- Place ingredients in container.
- Tightly screw outer base into container.
- Place mill on motor housing.
- Plug in, hold mill and press both (2).
- After grinding, switch off (3). Unplug.

CAUTION

- Maximum capacity: 50g
- Motor use with wet ingredients or liquids.
- Do not operate more than 60 seconds at one time.

HOW TO CLEAN

Juicer

- Fill container with water. Wash brush.
- Place a glass under spout.
- Plug in. Switch on.
- Insert brush in cover opening. Move brush up and down across spinner while squeezing container to squirt water from brush.
- Wash other parts in water and dry.

CAUTION

- Do not switch on or off while brush is inserted.

Blender

- Half fill container with lukewarm water. Operate for cleaning.
- Remove container and packing from container base. Rinse each part and dry.
- Wipe off stains with damp cloth and dry.

Dry mill

Wipe container and cutter with dry cloth only.

CAUTION

- Never remove or attach container when motor is operating.
- Do not open the container or place anything (especially finger, spoon, fork, etc.) in the container during operation.

SPECIFICATIONS

Model No.	RM278
Power supply	AC220V/50HZ/500W/240W
Speed	9000-11,500rpm (Blender), 13,200rpm (Juicer)
Blender container	Maximum: 1,000ml Glass
Dimensions (JAWARD)	SC: 1 x 26.8 x 25.5cm (LxWxH)
Weight	1.2kg
Accessory	Dry Mill & Motor (Glass)

Before using, make sure voltage and frequency indicated on the bottom are the same as your local supply.

MODEL:RM/278

MULTIFUNCTIONAL FOOD PROCESSOR

Operating Instructions

Before operating this unit, please read instructions completely.
