Electronic Insect Killer Instructions RM/279

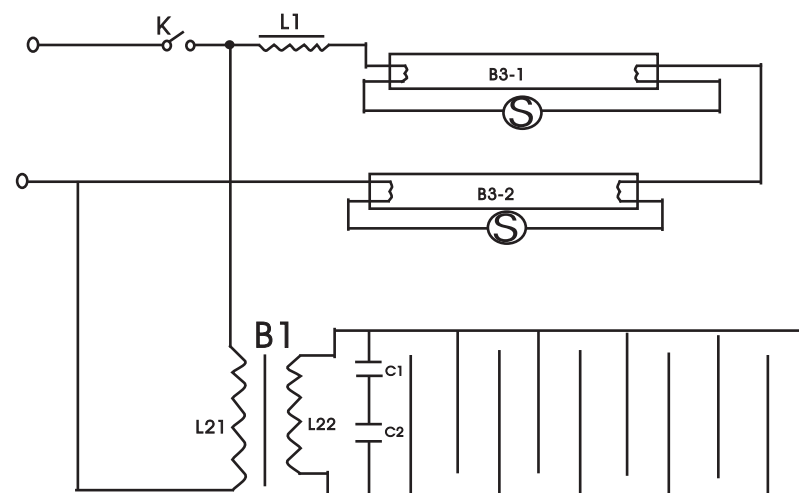

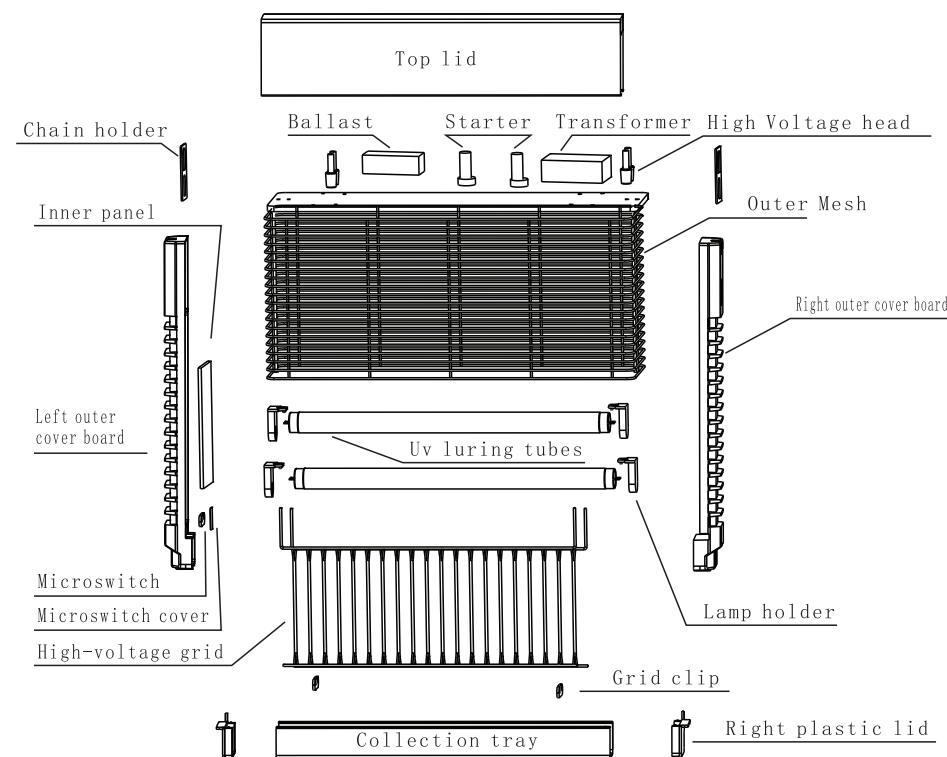

The electronic insect killer utilizes the black light (ultra-violet rays) of the wave length, which is proven to be the most effective lure for light sensitive flying insects, such as flies, moths, mosquitoes, and other flying insects. These insects are electrocuted by the electrically-charge metal grids. No chemicals, no smell, no sprays, no mess, pollution free and harmless to humans and pets. It is ideal for using in houses, factories, food outlets, cold rooms, hospitals, and other places.

WARNINGS:

1. High voltage! Disconnect power before repairing or cleaning
2. Children should not play with it.
3. Never put metal objects inside the grids while in operation.
4. Keep away from flammables.
5. Check the local voltage before operating.
6. Hang or mount on a place where children cannot reach.
7. If damaged, supply cords must be repaired or replaced by a qualified technician.
8. The insect killer cannot be used in garage, stable or similar places.
9. Clean the collection tray regularly.

The compulsory cautions: "This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety"

Main power specifications: 220V-240V 50Hz/60Hz

L1-ballast
B1-high-voltage transformer
K-power switch
S-starter

C-condenser
B3-1 tube
B3-2 tube
